2007 Mass Transit Expenditures preliminary estimate
Personal vehicles: automobiles, SUVs and motorcycles
Dollar amounts and person miles in billions
Data calculated from these sources:
Estimated from NIPA Table 2.5 and
National Transportation Statistics Tables 1-37 and 3-7 and 3-13
US Census Bureau governments database
National Transit Database
American Public Transportation Association
Fixed costs: Vehicle purchase \& insurance. Variable costs: all other costs
Prelimary data (last year) estimated in anticipation of final data from the US Bureau of the Census goverments database (for transit expenditures) and the US Department of Transportation "Highway Statistics," for passenger miles
General tax support for highways includes all spending minus highway user fees. Debt receipts and payments excluded.
Personal vehicle subsidies: Low assumces federal estimate. High is midpoint between $100 \%$ and federal estimate
1960 non-auto person miles (light trucks) estimated

[^0]:    Note: The automobile operating costs per passenger mile are below figures used by Hertz Rental Cars and the American Automobile Assocation (AAA). Hertz and AAA include only newer cars in their calculations. The average automobile in the United States is now approximately nine years old. The figures in this table represent the gross expenditure on automobiles in the economy based upon US Department of Commerce Gross Domestic Product Accounts.
